

Circleslide, My Reward

I live in a dusty town
Just about an hour south of nowhere
And I dream about the stars and all the flying cars I've seen in movies

It makes me want to go now into the future
I want to sail off into the future
I want to feel love I know it's out there
You and me love we're going to find it

That's where we want to go
That's where want to go now into the future

They say the end is near and everybody fears The Meteor
But darling don't you cry
The maker of the sky will dry your tears
