

Circulatory System, The Lovely Universe

here comes the perfect day
we're inside the milky way
to revolve around the sun, and believe
that it's a lovely universe
in us all, and you'll be fine
you've got the planets and stars
and the planets and stars they're inside you
the meaning came today
all your questions slipped away
just revolve around the sun, and believe
that it's a lovely universe
in us all...
in the lovely universe
we can use more than five senses
the feeling came today
we finally slipped away
and found a little cloud, floating free
in thee lovely universe (in us all)
