

# Claude King, Beertops And Teardrops

You can find me anytime that you want to  
But I've been here so long nobody seems to want to  
In this very room another man took the place of me  
A room filled with beertops covered with teardrops that's where you'll find me  
Beertops covered with teardrops in every corner of the room  
Barstools and drunken fools and the spell keep with you  
This old smoky room so filled with bloom has got the best of me  
A room filled with beertops covered with teardrops that's where you'll find me  
( steel )  
I wonder how long it's really been now since I seen the sunshine  
Do the flowers bloom do the birds sing how they did one time  
If your new love ever leaves you you can come and visit me  
In a room filled with beertops covered with teardrops that's where you'll find me  
Beertops covered with teardrops...
