

# Clea, Download It

(Download, download, download, download)

We're miles away and my heart beats fast  
And I miss you so bad, I won't last  
So we'll boot it up and I'll wait for the sign  
It's telling me, babe, we're online  
Connection's made and I'm straight through to you  
I see your picture with eyes so blue  
Let the air con fail cos I'm hotter than hell  
The rest is secrets I can't tell

Yes I like to touch, you know I like to taste  
But without you it's never quite the same  
Boy it ain't no use, one thing for a girl to do

Chorus

Download it, download it  
Gotta shoot that smile for me  
If you download it, download it  
I'll be safe in the arms of love  
Download it, download it  
Next best thing to reality  
If you download it, download it  
I'll be safe in the arms of love

I close my eyes and the image appears  
The dream that I dream is right here  
No, I won't deny what my body needs  
So we'll do what you do til I feel  
The pleasure/pain and the whispering names  
We'll lose consciousness for a time  
Come round, you're gone, screen saver's on  
When you ain't here you blow my mind

Yes I like to touch (like to touch), you know I like to taste (like to taste)  
But without you it's never quite the same (never quite the same)  
Boy, it ain't no use, one thing for a girl to do...

Chorus x 2

I'll be safe in the arms of love

We're miles away and my heart beats fast  
And I miss you so bad, it won't last  
So we'll boot it up and I'll wait for the sign  
It's telling me babe, we're online  
Yes I like to touch, you know I like to taste  
But without you, it's never quite the same (never quite the same)  
Boy, it ain't no use  
One thing for a girl to do (girl to do, girl to do)..

Chorus x 2

Download it, download it (shoot that smile for me)  
You've got to download it  
Download it (load it, load it....to fade)
