Clean Bandit, Everything But You (feat. A7S)

Oh my heart needs some headspace
Every night try to escape
Got me calling for your name
Feel you touching

You take me to a place only we know
Away from all the noise and the people
You take me to a place only we know
When I hear your voice say the word and we'll go

Coz darling when we pull close
I know we can pull through
I just wanna let go
Of everything but you
Coz nothing even matters
If it's me you're holding on to
I just wanna let go
Of everything but you

Everything but you

I'm so tired of the hollow
Show me signs I can follow
Baby I go where you
Don't you know that

You take me to a place only we know
When I hear your voice say the word and we'll go

Coz darling when we pull close
I know we can pull through
I just wanna let go
Of everything but you
Coz nothing even matters
If it's me you're holding on to
I just wanna let go
Of everything but you

If I lose, if I'm losing myself tonight
I'll be fine if I'm finding me by your side
If I lose if I'm losing myself it'll be alright

Coz darling when we pull close
I know we can pull through
I just wanna let go
Of everything but you
Coz nothing even matters
If it's me you're holding on to
I just wanna let go
Of everything but you
