

Cleavage, Future's Fire

Some things I've seen can't compare to my worst dream.
That hazy moon will be ash in the wind real soon.
You can call me a liar
Called it out and started a fire
(the fire, the fire, the fire)

Even though (the fire, the fire)
It'll burn a hole inside you
Even though (the fire, the fire)
Is soon to burn out baby

After dark is day.
I know it hurts but we're here to stay.
Everything I did to this point I know I have to shout it (out)
I just can't stop
(The fire, the fire, the fire)

Even though (the fire, the fire)
It'll burn a hole inside you
Even though (the fire, the fire)
It's soon to burn out baby
Even though (the fire, the fire)
It'll burn a hole inside you
Even though (the fire, the fire)
Is soon to burn out baby

And who's to say we're going away or even start a fire.
And who's to say we'll go up in flames or even die out.
And who's to say there will even be another day.
'Cause we all know where the wind blows so we can run for cover.
(Fire, the fire)

Even though (the fire, the fire)
It'll burn a hole inside you
Even though (though), it's soon to burn out baby
Baby, baby, baby
Baby, baby, baby
