

Cliff Richard, Brother To Brother

Brother to brother, heart to heart
There's something I've been trying to tell you
No matter where you are
From cradle to shining star
You're someone to look up to

Brother to brother worlds apart
One day I'll promise I'll be with you
Always I'll love you
Now just a memory
A lifetime of rivalry
I couldn't have a better friend than you

I used to criticize the way you used to be
The child that had the look that dreams are made of
A window to the past looks onto everything I see
The fire went out the flame just dies

I couldn't have a better friend than you

Brother to brother, when we meet again
There'll be no differences between us
Free from the darkest night, free till we see the light
Burning ever after

Time is a healer, calming our fears
A thousand questions left unanswered
Oh I believe in you
Brother of mine

Have you ever had somebody you were close to
Become a memory that's larger than life
Have you ever felt there's beauty in distortion
If faiths a crime give me a clue
And if it is then brother it's still you
