

Clifford T. Ward, Always Think About You

I can wonder at

Wonder why

It's always been the same

I've heard lies and

Children cryin'

Still I hear your name.

And I always think about you night and day

And I wonder where you are

And I think about you night and day

I still love you.

I don't wonder at

My despair

At everything I see

People dying and

Little care

It all comes back to me.

And I always think about you night and day

And I wonder where you are

Always think about you night and day

I still love you.

INSTRUMENTAL

And I always think about you night and day

And I wonder where you are

Always think about you night and day

I still love you.

And I always think about you night and day

And I wonder where you are

And I think about you night and day

I still love you.
