

# Close To Home, These Nights Of Broken Glass

You found yourself alone  
Underneath the burning starlit sky  
The smoke is suffocating  
Cover up your blood shot eyes

The people crowd the streets with fear, the enemy is here  
They?ll cut us down now one by one  
The buildings crumble now with every step you take  
Just place your trust in me tonight, Ill steal your fears away

Stand by my side  
Don?t you try to run away and hide tonight  
Stand by my side  
You will never make it out alive this time

They?re only steps behind  
The path we pave tonight  
So hurry now  
So hurry now

I see their breath set in  
Intentions soaked in sin  
They?re all around  
They?re all around

So say goodbye to every memory we?ve made  
The past is gone forever  
It will never be the same

Stand by my side,  
Don?t you try to run away and hide tonight  
Stand by my side  
You will never make it out alive this time

Make it out alive

I'm falling faster  
You did it again  
Falling faster

Stand by my side  
Don?t you try to run away and hide  
Run away and hide  
Stand by my side  
You will never make it out alive  
Make it out alive
