

Clouds, Cloud Factory

How we forget
We've been through this a thousand times
Or more
Till it comes to pass
There's still sand in our glass

Clouds in the sky
Now I know where you come from
I drove by
Just the other day
Cloud factory
You're so tall like a beanstalk
But your clouds
They're all made of lead
At least that's what the man said

But still we close our eyes
And the oil on the water
Matches the rainbow in the sky
High in the sky

Tears in my eyes
There's a black trail running down
To the sea
Try to ignore
All the signs of the dying
And you'll end up dead
Way before your time
Did you read the signs?

But still we close our eyes
And the oil on the water
Matches the rainbow in the sky
High in the sky

Did you read the signs?
But still we close our eyes
And the oil on the water
Matches the rainbow in the sky
High in the sky
