Clutch, Red Horse Rainbow

Pan-amoebic algebra, breed bizarre bacteria, what to do, oh what to do
Africanized killer bees, alabastar dieties, milk from spoons, sip milk from spoons
Within the ruins against the firth
The salamander has given birth

Only red horse rainbows can save us
Let them run wild and asunder
Call the royal guard to let the people in
Flaming arrows by hundreds

Pull the bog man from the peat, stand him up on both his feet
He jigs and reels, he jigs and reels
Infiltrating silver crabs, carry a most scented flag, to their front lines, to their front lines
Within the ruins
Against the firth
The salamander has given birth

Only red horse rainbows can save us
Let them run wild and asunder
Call the royal guard to let the people in
Flaming arrows by hundreds

And now the salamander

Run to the tower and call up the magus
If he has caused this, we'll tear out his pages
Throw 'im in shackles
And remove his hands
