

# Code Red, What Is Good A Heart

I told you how I felt  
I told you what it meant  
But I still haven't changed your mind

I know that you're afraid,  
You're frightened of the pain  
But you can let down your guard

Cause when we run, we hide  
We deny what's inside

Chorus

What good is a heart, if you're not gonna use it?  
What good is your love, if you're too scared to choose it?  
If your heart is beating, then it's for a reason  
If you're not even willing to start, what good is a heart?

Don't make the same mistake that people often make  
And miss out on a chance for love

You've got to make your move, you've got to make it soon  
Cuz you're dying inside

Cuz I'm a man, but I cry  
I have fears, I won't lie

Chorus

Come on baby, you know it  
Girl anyone who looks can see that I'm right

There's a chance, we should take it  
Or regret it for the rest of our lives

Chorus
