

Cold, God's Song

A victim to another level
That noone ever cared about
The way i ease my sufferin
Is killin me again
I would not prescribe this feeling for you
A pain with slow sustain
Like a sad song lives on
When the world wont take you back
You know everyones the same
Were all a part in gods song
Cant live with this pain forever
Theres nothin left to talk about
The rain outside is troublin
It takes me back again
If i cant describe my feeling for you
The game will never change
Like a sad song lives on
