

# Cold, Ocean

If the wind could bring the rain  
I would save it all for you  
Make an ocean to sail away and begin again  
They said i could never change  
That i cant belong to you  
Than i watched you slip away in the oceans arms

I'll never get you back.  
Its like fallin down a wave,  
Fallin down a wave

If a star could light the way  
That could take me back to you  
And the rain could wash away  
Everything ive done  
Only melody remains  
So i sing my song to you  
As i watched you slip away in the oceans arms

I will never get you back
