

Cold, Outerspace

This is the time
To let them know who's side your on
Everythings fine
No one got raped here
We had the time
Set up to leave to go back home
Back to our lives
I'll never let go

I wanna go up to outerspace
No one, but me and you

So far away
We may become forgotten
Take off today
And leave this world

We can't complain
Suspended high above you
Nothings the same
Nothing grows old

I wanna go up to outerspace
No one, but me and you

Just trying to get back home
