

# Cold, The Calm That Killed The Storm

Its when my world comes down  
You wanna change your lil ways  
Tommorrows another start  
But it looks like evryday  
You cant imagine how i wished that  
You could be the one  
Inside you were not the same  
But you look like evryone  
Its like a tidal wave that rose to take  
The stars  
A hurricane that wrapped around my heart  
If i could find away i'd make a brand new start  
I cant believe it was the calm that  
Killed the storm  
Inside you broke my heart and took a lil piece of me  
Maybe one day we'll try again  
But it wont ever be the same  
If i dont hold on now  
Everything fades and slips away  
Tommorrows another start but it looks like everyday
