

# Coldplay, Coloratura

Coloratura

We fell in through the clouds  
And everyone before us  
Is there welcoming us now  
It's the end of death and doubt  
And loneliness is out

Coloratura

The place we dreamed about  
The melodies inside yourself  
And love come pouring out  
And everyone's allowed  
We're feathered by the crowd

And up there in the heavens  
Galileo and Tose pining for the moon  
Know it's a slow burn  
Through pioneer and helix
