

# Coldplay, How You See The World No. 2

They put the world in a tin can  
Black market, contraband  
And it hurt just a little bit  
When they sliced and packaged it  
In a long black trench coat  
Two hands around the throat  
Oh, you wanna get it right sometimes

There's so much to be scared of  
And not much to make sense of  
How did the clowns ever get control?  
Ah, if your hear can you let me know  
How can they invade it  
When it's so complicated?  
Oh, you wanna get it right sometimes  
You just wanna get it right sometimes

That's how you see the world  
How many times can you say  
You can't believe what you learned

That's how you see the world  
Don't you worry yourself  
You're not gonna give up

Oooohhhh...

And there's something missing  
Seems like there's nobody listening  
If you're running in a circle  
How can you be too careful?  
We don't wanna be man trapped  
We don't wanna be shrink-wrapped

Ohhhhhhhhh...

We just wanna get it right sometimes  
We just wanna get it right sometimes

That's how you see the world  
How many times have you heard  
But you can't believe a word

That's how you see the world  
Ah, don't you worry yourself  
Cause nobody can hurt you...

Ooooooh  
Ooooooooh

Ooooooooh

That's how you see the world  
That's how you see the world
