

Colin James, Better Way To Heaven

Turned on and wide awake
Dust it off as a lonely day
We're gonna go where the bed's (band's?) got soul
(c'mon) Just sing away all my pain
Sweet honey 'thin my veins
We're gonna twist and shout and forget our names

Swing low and turn the lights down
I don't wanna know a better way to heaven
I can feel you shine around me
And I don't wanna know a better way to heaven

I'm gonna make a name
I'll make you my famous claim
And I'll take you downtown every night
Think you can lock me up
Show me what it's all about
There's no star I could follow like i follow you

Swing low and turn the lights down
I don't wanna know a better way to heaven
I can feel you shine around me
And I don't wanna know a better way to heaven

I wanna know what it's all about
I just know when it all works out
Yeah yeah, yeah yeah

I heard the gospel truth
And I got it all from you
You got your message through on time
You must be a saviour's daughter
Feel like I can walk on water
When I feel your sweet lips touchin' mine

So swing low and turn the lights down
I dont wanna know a better way to heaven
I can feel you shine around me
I dont wanna know a better way to heaven

Swing low and turn the lights down
I dont wanna know a better way to heaven
I can feel you shine around me
I dont wanna know a better way to heaven
