

Colin James, Going's Good

What you don't like to think about
Is what you probably should forget
You cant take it with you where you go
Get out while you can and try to clear you head

Go where the going's good
Been where the going's been

I hope those tickets are in your hand
There's keys in the car for you when you land
If I dont hear from you again
I know you'll grab the reins and listen to what I said

Go where the going's good
Been where the going's been
It don't feel like it should
Go where the going's good

And you can waste all of your life
Waiting for your time to come around
But you know it dont seem right
Sitting around to lose this happiness you've found

Go where the going's good
Been where the going's been
It don't feel like it should
Go where the going's good

solo

Go where the going's good
Been where the going's been
It don't feel like it should
Go where the going's good

solo

Go where the going's good
Been where the going's been
It dont feel like it should
Go where the going's good
