Collapsis, Wonderland

Holly made an angel in the snow She wished under the stars, and winter sand Then she whispered to me from below I think her fallen heart fell in my hands. She said, "Even in this cold December sky Know you are the center of my life." And all that could mean...

Chorus:

So I jump from joy And I sing out loud And her smiling face makes me proud And this frozen world Somehow it all falls down Somehow it all falls down

Holly never thought our love would grow Or ever go beyond this Wonderland She said, "I will always keep you in my heart We can be together and apart." It's all just a dream...

Chorus

And I'm gonna hang on till the end And all that could mean Another year ends and then begins It's all just a dream Still I'm gonna love you where I stand If I stand at all Still I'm gonna do the best I can.

Holly made an angel in the snow She wished under the stars and winter sand.

Chorus x 2

Holly made an angel in the snow...
