

# Collide, Have Faith

Climb all your mountains to see what you see fly all you warriors  
and don't fear the skies ask all your prophets and then you decide  
heed all your warnings and see through the night

feel the ice is melting see it burning down  
hear the answers calling look until they're found

dance all you dreamers and lovers of life  
know that there's more than just black or white  
shed your disguises and don't criticize  
seek all your answers and sleep through the night

feel the ice is melting see it burning down  
hear the answers calling look until they're found

the answer lies inside...

pandora's box

pandora's box step inside pandora's box i don't mind

steal this very moment  
dive right through the sea

pandora's box stay away pandora's box stay with me

feel this tides emotion twist inside of me  
writhing sensation  
come watch over me  
beautiful tragic warriors go cascading from the sky

pandora's box pulls me under  
pandora's box makes me wonder  
why

see it shine  
look inside  
you cant hide  
from me  
beautiful tragic warriors go cascading from the sky

pandora's box stay away pandora's box stay with me
