

Comecon, Dispstick

The stone of the wise tricks Your eyes
It's another breakthrough in homiletics
There's been an attempt on ordinary lives
Illfare administered by social medics

Unlike Deutschneyland after dark
Here is science without failure
Non-existent speciesw in cretaceous park
A freer market meticulously tailored
We need night observation devices
We need new methods to set the prices
We need means to handle incorporate thugs
We need a name for every bug

We're host to parasitic inorganic tissue
So oil prospecting is not the issue
There's inexhaustible competition
With footmen at home with foreign missions
But the halo crumbles under the weight
Of their private real estates
We've got artificial stupidity
Now what could be done about exergy

Well, Deutschneyland after dark
There is science without failure
Non-existent speciesw in cretaceous park
A freer market meticulously tailored
We need night observation devices
We need new methods to set the prices
We need means to handle incorporate thugs
We need a name for every bug
