

Concrete Castles, Just a Friend

Why do you hide when your phone lights up the dark
Turning a cheek just to keep us apart
Hiding a smile I see right through you
Tell me the secrets I always knew

I don't know what's behind these eyes
Underneath all the pretty lies
Haunting me leave me for dead

You said she's just a friend
Don't let it get into your head
I'll always love you
And I'll never replace you

Tell me that it's true
You didn't find somebody new
Thought you're with me till the end
But you just perfectly pretend
That she's just a friend

Do you still feel her in your shotgun swat
Flying down the 405 did you about me
Broken memories clouding up your mind
I guess I'll never mean as much but I still try

I don't know what's behind these eyes
Underneath all the pretty lies
Haunting me leave me for dead

You said she's just a friend
Don't let it get into your head
I'll always love you
And I'll never replace you

Tell me that it's true
You didn't find somebody new
Thought you're with me till the end
But you just perfectly pretend
That she's just a friend
