

# Conditions, Our Way Home

So open your eyes  
Don't let this feeling inside  
Question everything you are, everything you are  
Breathe in deep, don't let the water fill your lungs  
Awake but motionless is such an ever-calming ground  
Again, again, again, your words, they ring so clear now  
So quick, I'm heading right into destruction  
Don't let go  
So focus on a way out  
It's not supposed to be like this  
So focus, it's close now  
This is very far from never ending  
This is nothing you won't live through  
And I won't let you fall any further  
If we sold our souls, what then do we live for?  
And I won't let you fall any further  
Never let it leave your mind, you are so alive  
When you're on your way home, you will know  
So focus on a way out  
It's not supposed to be like this  
So focus, it's close now  
This is very far from never ending  
To be set free, would be the first step away from me  
To be set free, would be the first and last in steps to sanity  
Do you have the strength to walk away?  
(Come closer now, we're getting closer now)  
Do you know how to live any other way?  
(Come closer now, we're getting closer now)  
So focus on a way out  
It's not supposed to be like this  
So focus, it's close now  
This is very far from never ending
