

# Conflict, Mighty And Superior

Mighty and superior we are the rulers you're the ruled  
We say the grass is greener on the other side, but you can't see that of course  
We represent the nation; it's our people we put first  
We even bail out third world countries  
It's our investment they deserve it  
Simply forcing back the Russians with peace missiles built for trust  
Screwing with the Yankees - law and order is our must

Sick and fucking tired of their collaborations  
Forwarding the clock to our extermination  
We've got a one way ticket for a seat to destruction  
It's their choice our must to rise with the mushroom  
Hail to the mushroom - the total combustion  
The realisation of annihilation  
Poseidon's answer, the trident blunders  
Your choice our must to die, but you are wrong

Mighty and invincible as they boil the seas for power  
Recruiting armies on the land to protect the state that covers  
From the Ruskies - from the dollar  
One's investment one is our enemy  
These people why can't they love?  
Human feelings don't that matter?  
Much rather they would rule, building castles and tycoons  
Throwing a crust out to the third world, sending rockets to the moon  
Making missiles, tanks and bombs  
Nuclear power for our homes  
Raising hell up from the mines  
To the last human sacrifice...  
Well, if you think all's well and strong, there is a movement that's uprising  
If you think we can take that, you've got one hell of a shock coming  
You might just have pushed too far - you are superior to nothing  
The Ungovernable Force is gonna drag you out of hiding  
You think you have got us beaten, but you make one slip and you'll know it  
We are watching every move you make, as you are us! But forget it  
For once we take an inch, you just watch us take the mile  
Your servants have turned their backs on you, now the world starts to smile!

Mighty and superior you are the rulers; we're the ruled  
You said the grass was greener on the other side, but we couldn't see past force  
You represent your people; it's your own kind you put first  
You bail out third world countries, your investment to preserve  
Forcing back the Russians with peace missiles built for?
