

# Connie Smith, Alone With You

I'd love to be around you when the lonely night surround you  
How I'd love to be alone with you  
What I'd give to have the power to read your mind one hour  
How I'd love to be alone with you  
Now just to be with you one night you and me alone  
Kiss your lips and hold you tight and have you for my own  
Well this could be a real beginning could be a joy unending  
How I'd love to be alone with you  
[ harmonica - steel ]  
I'd love to be around you when the lonely night surround you  
Man I'd love to be alone with you  
If I only knew for certain I'd cut out all my flirtin'  
How I'd love to be alone with you  
Now just to be with you one night you and me alone  
Kiss your lips and hold you tight and have you for my own  
Well won't you try be my baby just once and then well maybe  
I could always be alone with you yeah I could always be alone with you
