

Connie Smith, Other Side Of You

An introduction to the other side of you
Oh yes I'm finding out some things I never knew
Now all at once it seems you are a stranger
If I've been introduced to the other side of you

Tonight I overheard a conversation by the ones who know the secret side of you
The things they said that you and her were doing
Makes it seem you're a man I'd never knew
An introduction to the other side of you...

[steel]

As I listened to the ones who know you better
And the things they said about you hurt me bad
I told myself that they could be mistaken
But still I can't forget the the things they said
An introduction to the other side of you...
