

Continuum, Continuum

Time is endless from what we conceive
Present transits from past to future
Eternal portion of time
Infinite piece of space

Everything relates to what we conceive
Everything becomes what we perceive

Space-Time Continuum
Vortex of relations
Space-Time Continuum
Nova of emotions

We think in terms of ticking time
Holding our breath in our biosphere
Sending messages light-years away
To the few already here

Space-Time Continuum
Cortex of conceptions
Space-Time Continuum
Cosmic interactions

Continuum will always be
As long as we conceive
what we perceive

Not a fool the one who transcends,
Hiding like an oyster shell,
A Pearl of the mind,
Altering space and time.

The quicker we travel
The faster we burn
Black holes in space feed on time
Blanks in our memories feed on our minds

Space-Time Continuum
Complex combinations
Space-Time Continuum
Quantum of abstractions
Words by Steph
Music by Continuum
