

Conway Twitty, On My Way To Losing You

She's not with me for the same reason you were
She's not here cause I won't her to be
She just took what was left when you said you were through
And I found her on my way to losing you
She made temptation the easy way out
And there were times you're all that we talked about
She knew the right things to say to help me find either way
And I found her on my way to losing you
[steel - guitar]
She loves me but it's hard to return it cause you bear it where she wants to live
She thinks I love her in time when I get you off my mind
And I found her on my way to losing you
She made temptation...
She was everything...
