

Cootees, Roses Are Red

Roses are red and violets are blue
I was all alone until I met you
For so long I was lost
But now I've been found
It brightens up my day when you're around me

Well, I know you're far away
But I think of you each day
And it's safe to say that
You're always on my mind
The day we met, I must admit
Since then I think about you all the time

You're the sunshine that would brighten up my day
And now it's been raining since you went away
If I could have all my wishes come true
Then one of the wishes would to be with you

I know you're far away
But I think of you each day
And it's safe to say that
You're always on my mind
The day we met, I must admit
Since then I think about you all the time

Roses are red and violets are blue
I was all alone until I met you
For so long I was lost
But now I've been found
It brightens up my day when you're around me

Roses are red and violets are blue
I was all alone until I met you
For so long I was lost
But now I've been found
It brightens up my day when you're around me

I know you're far away
But I think of you each day
And it's safe to say that
You're always on my mind
The day we met, I must admit
Since then I think about you all the time...

I do...I do...I do, I do, I do...
