

# Cosmos, I hear your hearth

I Hear Your Heart

In a world that is beeping and blaring

Growing louder every day

I cover my ears

But none of the noise will go away

Sirens,

Barking dogs

Thank God for the one and only sound that turns it around and makes it right

CHORUS:

I hear your heart

Whisper to me

No matter where I may happen to be

Sending me love and shining it through

I hear your heart

Can you hear mine too?

Oh as sensitive people were trampled

Almost everywhere we go

There are days when we will die

If one more stranger tells us no

So I hope your shadows melt away

As you say they've done before

Just like the one and only sound that turns it around for me once more

CHORUS:

I hear your heart

Whisper to me

No matter where I may happen to be

Sending me love & shining it through

I hear your heart

Can you hear mine too?

Bridge:

A violin on a summer night

On a full moon mountaintop

Couldn't sound as sweet as you do don't stop

CHORUS
