

Craig David, Meant To Be

(Now you know what love is
Pulling up in that whip
Now you know what love is
Pulling up in that whip)

Listen

See I know this girl from way back
I'm talking way back City College days
We had a thing, call it a throw back
She loved dating bad boys, yeah she played the game
Now fast forward, yeah we're talking ten years later
Couple lovers, couple players, couple breakups
Now we always said we're better off together
(It's funny how we met again)

This could be different (we both know that)
This could be different (ready to show it)
This could be different, you'd better know
It ain't gon' be the same again

You know those past relationships, some of them go bad
But you know this is different, you already know that
You don't have to pretend, you don't have to hold back
It's just meant to be, it's just meant to be (yeah)
You know when you love someone, you love them so bad
You ain't never felt it, never felt it like that
'Cause every time we making love just as you lay back
It's just meant to be, it's just meant to be

You know I'm a believer that if it's meant to be, there's a right time
You know when all the stars align the universe giving that co-sign
Guess that we've both been waiting for this special moment for our whole lives
(That's why it's funny how we met again)

This could be different (we both know that)
This could be different (ready to show it)
This could be different, you'd better know
It ain't gon' be the same again

You know those past relationships, some of them go bad
But you know this is different, you already know that
You don't have to pretend, you don't have to hold back
It's just meant to be, it's just meant to be (yeah)
You know when you love someone, you love them so bad
You ain't never felt it, never felt it like that
'Cause every time we making love just as you lay back
It's just meant to be, it's just meant to be

You be saying ooh

Now you know what love is, yeah
Never felt it like this, yeah
Pulling up in that whip, yeah
Call me up short notice, yeah
Now you know what love is, yeah
Never felt it like this, yeah
Pulling up in that whip, yeah
Pulling up in that

You know those past relationships, some of them go bad
But you know this is different, you already know that
You don't have to pretend, you don't have to hold back
It's just meant to be, it's just meant to be (yeah)
You know when you love someone, you love them so bad

You ain't never felt it, never felt it like that
'Cause every time we making love just as you lay back
It's just meant to be, it's just meant to be
You know when you love someone, you love them so bad
You ain't never felt it, never felt it like that
'Cause every time we making love just as you lay back
It's just meant to be, it's just meant to be

(Now you know what love is
Pulling up in that whip
Now you know what love is
Pulling up in that whip)
