

# Crystal Gayle, Me Against The Night

Moon please don't shine on me Help me hide his memory  
Stars don't light the midnight sky cause you don't want to see me cry  
Heart don't let me think of him Lock your door don't let his memory in  
I feel the cold wind blowin through A love like this was meant for two

Chorus:

But its me against the ight and I'm afraid it's a losing fight  
I see you in every shadow of the room You're not here to hold me tight  
I can't wait til the morning light There's no way to win  
When it's me against the night

Gone you said you'd never be And all of you belonged to me  
burning tears fall down like rain longing for your love again

Chorus

Ending:

Me against the night
