## Cult Of Luna, Leave Me Here

Out of a secret longing They know their way from here Out of a growing dream They follow the road we create

I see what I've cut behind me Lost on the bottom, you often found me there False conscience is beyond me Lost in the backwoods, I lie open to you here Just leave me here

These men are running hard But you keep down your voices Living only to judge heavy All mysteries aside, there was a truth outside

Leave me here and I'm born again Leave me here in this void again Now I am open, left for dead Just like salvation comes in the end
