

# Cyclefly, Drive

I'de feel no pain, if I was so far away (far away).  
I'de feel no pain, as the last train leaves its cage (leaves its cage).  
I dream of a place to go, dream of a place to hide.  
Just get out and drive away forever, get out and drive away.  
I'de feel no pain on an island far away (far away),  
From your road rage, and your slow drain, and your human waste.  
I dream of a place to go, dream of a place to hide.  
Just get out and drive away forever, get out and hide away together,  
Forever, drive away forever, together, forever.  
I dream of a place to go, dream of a place to hide.  
A place that no one knows, sometimes I get out and  
Drive away forever, get out and hide away together, forever,  
Forever, together.  
Get out and drive away, get out and drive away, together,  
Forever, forever together.  
Get out and drive...
