

# Cyndi Thompson, If Only You Could See

You come home uncompleted  
down and defeted feeling all alone  
You think your dreams are passing by you  
and deep down inside you you're running out of hope

If you could only see what I see  
you'd see the man that you wish you could be  
If you could only see what I see in you

You're my strength the light that guides me the path that I walk  
When I wake up you're why I want to the one I hold on to  
when I start to call

If you could only see what I see  
you'd see the man that you wish you could be  
If you could only see what I see in you

Wish I could make you believe in all that you are you don't have to be  
Everything to everyone everybody's number one 'cause baby you're  
everything to me

If you could only see what I see  
you'd see the man that you wish you could be  
If you could only see what I see in you..
