

Dan Bern, No Missing Link

They look for the missing link
There's no missing link
They'll never find the missing link
There's no missing link
We're not something you can figure out with an equation
We are the genetic mutation
Aliens came and f**ked the monkey, they f**ked the monkey
Aliens came and f**ked the monkey, they f**ked the monkey
Darwin tried explaining it, Darwin did the best he could
Evolution, pretty theory,
But how could Darwin know
That aliens came and f**ked the monkey, they f**ked the monkey
Aliens came and f**ked the monkey, they f**ked the monkey
How else explain fax machines
How else explain computer enhancement
How else explain fiber optics
How else explain Mozart
We do not belong here, this planet was a terrarium
Intergalactic broken home, have to go to outer space
And one day find our daddy-
How else explain pay at the pump
How else explain limited access freeways
How else explain digital remastering
Plastic flowers, linoleum, beefalo
Michael Jordan
Religion, astronomy, astrology
That looks to the stars
We do not belong here
This planet was a terrarium
Seven billion bastards
Screaming for our daddy
Aliens came and f**ked the monkey, they f**ked the monkey
Aliens came and f**ked the monkey, they f**ked the monkey
etc.
