

Dan Hill, Hold me now

If I could make sweet love to you
All through the night
All the problems of my world
Would slowly fade away
How can I be sure that everything you say
Isn't just another line designed
To steal my heart away
Just let me hold you now
I wanna feel you in my arms
Let me unfold you now
Endlessly
Just let me hold you now
Friend to Friend
Lover to lover, hold me now
I feel your touch and it stirs me deep inside
Still I need to know
There's more than passion in your eyes
Oh girl
You are much more than something physical
Can't you see
You don't have to stay the night
Baby tell me what you want from me
Repeat Chorus
If we make love
I need you baby
I wanna lose myself to you
We'll rise so high above
I don't wanna be alone tonight
Don't leave me now
I just want you to hold me now
