

# Daniel Bedingfield, I Can't Read You

I'm never shy but this is different  
I can't explain the way I'm feeling tonight  
I'm losing control of my heart  
Tell me what can I do to make you happy  
Nothing I ever say seems to come out right  
I'm losing control of my heart, yeah

And I wish that I could be  
Another better part of me  
Can't hear what you're thinking  
Maybe if I just let go  
You'd open up your heart

But I can't read you  
I wish I knew what's goin' through your mind  
Can't touch you, your heart's defending I get left behind  
Can't reach you  
I wish I knew what's going through your mind  
Can't touch you, your hearts protecting  
I get left behind

I like you so much I'm acting stupid  
I can't play the game I'm all intense and alive  
I'm losing control of my heart  
I'm not supposed to be this nervous  
I should play my hand all cool and calm  
I can't breathe  
I'm losing control of my heart (yeah yeah yeah)

And I wish that I could see  
The other better parts of me  
Feel this fire I'm feeling  
Then you'd see me in control  
And baby then you'd know

But I can't read you  
I wish I knew what's goin' through your mind  
Can't touch you, your hearts protecting  
I get left behind  
Can't reach you, I wish I knew what's going through your mind  
Can't touch you, your hearts defending  
I get left behind

I wish that you could see  
A better part of me  
Feel this fire I'm feeling  
Then you'd see me in control  
And baby then you'd know

But I can't read you  
I wish I knew what's goin' through your mind  
Can't touch you, your heart's protecting  
I get left behind  
I can't read you  
I wish I knew what's going through your mind  
Can't touch you, your hearts defending I get left behind

Can't read you  
I wish I knew what's goin' through your mind  
Can't touch you, your heart's protecting  
I get left behind  
I can't read you.  
I wish I knew what's going through your mind  
Can't touch you, your heart's defending I get left behind

Can't read you  
I wish I knew what's goin' through your mind  
Can't touch you, your heart's protecting  
I get left behind
