

Daniel Cage, Never Come Down

Come tomorrow I'll start again
Come tonight I will pretend
On your world i wanted more
You help me to touch down
I build you up now i can't get you down

Chorus
in your light i feel no pain
you saved my life again
From your station high i hear your sound
so never come down never come down

If I'm here tomorrow then I'll believe, Like a miracle
The perfect air you make me breathe, Like a Chemical
I build you up now I can't get you down

Chorus

You shine on me I shine on you
I forget everything I thought i knew
You're down on me I'm down on you
And I won't believe

Chorus

Cold is the night without any sun
I need you light before I'm gone
Cold is the night without any sun, I need you light
