

Daniel Cage, Only You

Holding out your hand i could feel
Where i go tonight I know is not real
Life without you could only be dry
Love makes me nervous but I think I could try
I want to see your love that could live
Next to me, We've got so much to give

Chorus

I don't want the neon lights and discos
And finding someone new
I don't want another day feeling the way I do
Theres only you, Theres only you

It's getting late and the night is to cold
Without you its getting and this crowds getting old
I want to leave, in your love I could dive
Before i was dead now you keep me alive

Chorus

(till song ends)
