Daniel Cage, Only You

Holding out your hand i could feel Where i go tonight I know is not real Life without you could only be dry Love makes me nervous but I think I could try I want to see your love that could live Next to me, We've got so much to give

Chorus

I don't want the neon lights and discos And finding someone new I don't want another day feeling the way I do Theres only you, Theres only you

It's getting late and the night is to cold Without you its getting and this crowds getting old I want to leave, in your love I could dive Before i was dead now you keep me alive

Chorus (till song ends)
