

Danny Fernandes, Never Again

Baby stop and think about it
Tell me where did we go wrong
How did it end like this
Can we work it out, i doubt it
We did all we could
And baby I cant go on like this
I never did you wrong ur trippin'
Listening to your friends and all the bullsh-t they had to say
It's like they loved you more than I did
So baby roll wit' your crew
And do what you gotta' do because
I never wanna kiss you again
Never wanna walk through the park holding your hand
No more talking all night until the early morning
It's such a shame to say that we'll never be the same...again
Baby stop and think about it
You lied to me, lied to me
The love we once shared girl no longer
It no longer remains and now its hard _____ because*
She never really knew she wondered
Was she being untrue or was I being a fool because
I'm gone and im never coming home
So baby don't call cause I won't answer the phone
Stay out of my life baby just leave me alone
And it's such a shame to say that we'll never be the same
I never wanna kiss you again
Never wanna walk through the park holding your hand
No more talking all night until the early morning
It's such a shame to say that we'll never be the same...again
Baby stop and think about it
You lied to me, lied to me
Girl you told me you'd be there for me
Promised that you'd never leave
You lied to me
Now I'm closing the door
Put my heart on the floor
I dont love you no more
Thats why I
I never wanna kiss you again
Never wanna walk through the park holding your hand
No more talking all night until the early morning
It's such a shame to say that we'll never be the same...again
