

# Darkest Hour, The Patriot Virus

We are the embarassment to market suicide  
Without eyes full of genocide  
We live where flags can buy more than others' lives  
Where it's fashion to show your love homicide [homicide, most likely]  
Of the victim we haven't seen enough  
For the victim it's the esape that keeps them drugged  
It's the best blood money can buy  
It's the best way to fund genocide  
A violent missionary sect  
Feeds a bullet for every word against  
Salvation in a warhead  
The patriot virus is being spread  
The only antidote the give is to fear what's next  
Prepackaged and advertised with a hymn  
Singing anthems for the walking dead  
Fear what's next
