Daughter, Lifeforms

[Verse] From the beginning Small lifeforms They can kill without warning So you don't explode Stop your growing limbs and thinking That you love them now you're blinking And reminding her of him Oh, you steal his features And your mother is a bleacher She don't even feel the heat, no She don't even want to speak to you

[Chorus] But you You'll always find another place to go Oh you You'll always find another womb to grow To grow To grow

[Verse]

Well you can try to sink down deeply Find the children lost at sea Find the children who discretely Were killed in infancy To stop them holding you and screaming That you lose your wildest dreaming Still reminding you of him How he left without reasons

[Chorus] But you You'll always find another place to go Oh you You'll always find another womb to grow To grow To grow

[Post-Chorus] Well you can try to forget me but I won't let you easily You can try to forget me but I won't let you easily I'm floating out in the water washed out to sea Drifting away with time you'll regret you've conceived it Clean up the dead you leave behind Just like insects Clean up the dead you leave behind
