

# Dave Dudley, George (And The North Woods)

George I was just a layin' here thinking I'm blind for that I was all alone  
Old timer if you weren't here to guide me I'd be lost and they'd never find my bones  
I just came here to the North Woods for some thinking  
A man's just gotta rest once in a while  
And I'm really glad you're still around to guide me  
It seems to me we walked a hundred miles  
You know how much I've always liked this cabin it's quiet and I get a chance to think  
I just can't figure things out in that city the bars are there and you know how I drink  
You know George I made a fortune in the big town my name is on the city limit sign  
And then fate laid her heavy hand upon me  
And brought the accident that left me blind  
Old buddy you know how that woman did me I guess you knew her better than I did  
George I guess you knew how much it hurt me  
The day the judge gave her our little kids  
She said she wouldn't care if I should drop dead  
With all that insurance I don't guess she would  
Most people think the wilderness is quiet  
But just listen to the wolves out in the woods  
Well tomorrow when I'll leave here I'll be different  
I'll ride the train when they say all aboard  
You've spent a lotta time here in the North Woods  
You are still goin' with me aren't you George  
George George where are you George  
George no kiddin' now George George don't foolin' where are you George
