

David Ball, I Want To With You

Well I guess I've been traveling light my whole life through
Thought if you never own nothing much nothing ever owns you
Until I looked at you I swear I never gave one thought to forever
Girl I never wanted to
Find a little spread with a creek running through
Build a little dream and make it come true
But now I want to with you girl I want to with you
Put I little ring third finger left hand
Stay with somebody who will love and understand
Girl I want to with you

When a man ain't looking no telling what he may find
Until I saw the light of your love I was walking round blind
I kept running with my restless heart thinking that's just the way things are
Girl it never crossed my mind
I think it's time to find a little spread...
[guitar - steel]
Find a little spread...
