

David Fonseca, Summer Will Bring You Over

Summer comes
With tacky souvenirs
Of all the stupid things we've done

Every year the heat defrosts these memories
I wonder where have you gone

We would stay until dusk came
We watched the sun until it was gone
Then winter came

You faded into rain and went away

Away

Summer comes
And takes me to those places
Where all the stories started at

I watch the sun as it slowly fades
Hoping it can bring you back

We would stay until dusk came
We watched the colors till they faded
Then winter came

You faded in the rain and went away

Away

Summer will bring you over
You will stay forever
