

# David Fonseca, Superstars

Your heart is broken  
And you don't seem to mind  
I guess it happened a little too many times  
Too many times  
You try and you got tired  
Those long a brighten stories  
You held a fire right under the snow  
They don't, they don't  
How could they really know?  
They don't

They don't know how it really feels  
They're just here on holidays  
Like dummies filling landscapes  
How could they see you cry?  
Do you remember me?  
I was the one that held you through  
I held a spotlight when you did that crazy dance

Dance with you  
I felt like superstars do  
Me and you  
We're just like superstars

I was around you  
You couldn't really tell  
I held you close while  
While you drove  
You just drove into hell  
You know, a kind of hurt that burns  
A light that loves you blind  
And while your feet go  
They go deeper in the sand  
You wave and drown  
You rave to the crown that says

But they don't know how really feels  
They're just here on holidays  
Like dummies filling landscapes  
How could they see you cry?  
Do you remember me?  
I was the one that held you through  
I held a spotlight when you did that crazy dance with me  
Yeah, you did that crazy dance  
You did that crazy dance with me

You did that crazy dance

'Cause they don't know how it feels  
They're just here on holidays  
Like dummies filling landscapes  
How could they see us cry?  
Do you remember me?  
I was the one that held you through  
I held a spotlight when you did that crazy dance with me

As I dance with you  
I felt like superstars do  
Me and you  
We're just superstars  
Dance with you  
Just like superstars  
Me and you  
We're just like superstars
